Southeast Susitna Area Plan Amendment
Management Units TT-01 and TT-01a
Land Classification Order No. SC-08-001A02
(ADL 232659)

The Commissioner of the Department of Natural Resources finds that this amendment to the Southeast Susitna Area Plan, described more fully in the Attachment, meets the requirements of AS 38.04.065 and 11 AAC 55.010-030 for revisions to land use plans and hereby adopts the amendment. The Department of Natural Resources will manage state lands within the area of the revision consistent with the following designation, classification and amendment intent.

- Designation: Waterfront Development (Wd)
- Classification: Waterfront Development Land (WFD)
- Management Intent: Multiple uses are allowed within this tideland parcel, including waterfront development activities. Area will be managed to protect wildlife habitat values, specifically Beluga whale feeding and migration areas; consult with U.S. Fish and Wildlife Service (USFWS) and National Marine Fisheries Service (NMFS) prior to issuing authorizations. Proposed authorizations are to avoid estuarine wetlands and important recreation and fish and wildlife habitat.

(Note: This amendment creates the new Management Unit TT-01a, encompassing approximately 538 acres from Management Unit TT-01.)
